Subject
proposed herbicides on public lands

1 Don't spray dangerous and deadly herbicides all over our public lands.
There are many alternatives available. I support plan C--no herbicides.

2 I present a one woman show abt Rachel Carson and quote from Silent Spring.
"These chemicals should be called 'biocides' for they kill all life, not
just the targets they are intended for."

3 I urge you to plan ahead for the next 7 generations--don't just take the
fast--and deadly--way out.

Lilith Rogers
